### Recipe For A Happy Life

Take a large quantity of cheerfulness and let it simmer without stopping. Put with it a brimming basinful of kindness, then all a full measure of thought for other people. Mix into these a heaping tablespoon of sympathy. Flavor with the essence of charity. Stir well together and then carefully strain off any grains of selfishness. Let the whole be served with love sauce and fruit of the spirit.

★  
..Always laugh when you can. It is a cheap medicine. It is the sunny side of existence.

—★—  
Let us have faith that right makes might; and in that faith, let us to the end dare to do our duty as we understand it.

As long as material values are their yardstick men won't measure up to their problems.

TRY A CLASSIFIED

## In the Legislature

By H. C. HAMMELL, M.L.A.

The second week of the Session saw a continuation of the debate on the Speech from the Throne, with many members on both sides of the House taking part.

Hon. C. E. Gerhart, minister of municipal affairs, indicated the Alberta Government will prepare a City Act which will cover all Alberta cities and replace the existing seven City Charters, all of which are different. This will provide uniformity of city charters for Alberta cities. The departments of the attorney general and municipal affairs, assisted by the cities involved, will prepare the legislation. Mr. Gerhart indicated that the cities today have wealth 8 million dollars in excess of what their assets were a year ago. At the same time, the city expenditure in dollars have been higher than in the past, but the actual rate of taxation has been lowered in some cases and there has been no substantial rise in any city of Alberta. The old rates on new wealth still provide sufficient money to cover all of the costs. The city centres of largest population have been denied hospital

ization at a dollar a day rate. During the same period of time in the rural municipalities, the rate of our taxation has exceeded the rate of increase in new wealth. The rate of taxation in the rural municipalities has kept an upward pace with the rising cost of living while it has provided municipal hospitalization. City residents are still paying hospital deficits through taxation and yet do not get the benefit of a dollar a day hospitalization. The government urges city ratepayers to request a plebiscite in which they can indicate their desire to have municipal hospital rates in Alberta cities.

Many members, including H. E. DeBolt and Gordon Taylor, urged the keeping of natural gas in Alberta and inviting industry to come to Alberta to use it. An enquiry will be made by the government into the matter of supply and needs for the purpose of seeing that the supply is always adequate to meet the provincial needs.

Mr. Ira McLaughlin contended an austerity program was not linked to prosperity and that "eat less and work more" was not a desirable slogan for Canadian people.

A motion was introduced into

the House from the Opposition side, requesting a branch of the University of Alberta to be established in Calgary, this motion was defeated. The request was turned down by the government because the present costs of the University have reached such a high figure that present circumstances do not warrant increasing this expenditure by the consideration of another branch of the University. It was felt that the future will hold the need for such a branch but that we have for the present reached the peak of enrolment at the University. When conditions reach normal the government is prepared to consider the Calgary branch on its own merits. It is felt that the province is better to have one superior University than two poorer ones.

Figures were given in the House that more than 29,000 miles of road were graded or gravelled or had other work done on them on the main highways of Alberta last year. There has been 182 miles of work on the Grimshaw road since last Session and more than 4,400 miles of highways have been maintained. Two hundred and thirty bridges, wood and steel, have been built or repaired, including the new bridge at Red Deer. The government contributed during that time, nearly two million dollars to municipalities and local improvement districts where more than 10,000 miles of road work have been done in the past year.

Debates also brought out the number of wells producing oil in Alberta in 1935 was 100; today it is 484. The number of wells producing gas in 1935 was 84, and today it is 235.

I urged the department of lands and mines to lend every assistance in the establishment of pulp mills in this province, and was assured this matter was being given every assistance.

## Beware of These Weeds

Five bad weeds that it will pay to keep off your farm are Leafy Spurge, Russian Knapweed, Hoary Cress, Field Bindweed and Toadflax. Although some areas in this province are already seriously infested, infestations generally are not wide spread. The best safeguard against introduction is to know what the plant and its seed look like, and make sure there are none of these weed seeds present in the grain you intend to sow.

In many districts there is a shortage of seed. Purchased grain might contain seeds of any of these weeds. Whether the grain you intend to sow was grown on your own farm, on the farm of a neighbor or was introduced from outside, if it contains weed seeds with which you are not familiar, have your district agriculturist identify them for you. It takes only seconds to sow weeds, but it takes many years to destroy them.

## CARD OF THANKS

I would like to thank the Carbon Old Timers Association for the flowers sent to my husband during his late illness.

Mrs. R. Saunders.

## VILLAGE OF CARBON

### NOTICE

BY Law No. 46  
DOGS

Dogs shall be destroyed unless owners have a receipt for license.

Pound fees, 50c a day.  
Order of Village Council.

## Snow

If any of our worthy citizens haven't had a recent opportunity of taking the stiffness out of their joints, you can rest assured that most of them have received their opportunity the last week-end.

The snow with its fury lasted approximately 40 hours in which time the wind did a remarkable job of filling in all our paths. The day after the storm, in a peaceful lull, everyone's first morning venture included digging their way to the street.

A walk down the main street of Carbon saw most of our merchants wielding a shovel battling drifts which Carbon citizens have not witnessed in many years.

A heavy snow fall has its advantage in that it provides moisture for our crops for the coming season. But it also provides many hardships at the time of the snowfall when farmers are isolated in the district, and cattle not being able to get near food and water. The costs entailed in clearing snow off the roads is extensive. Where the money could be spent on building better roads, thousands of dollars are spent in the event of a heavy snowfall, in clearing it.

At any rate the snow has given our citizens a good opportunity to limber up, especially for those who have probably become stiff at the joints as a result of recent bonspiels.

## Council Meet

Ernest Fox was sworn in as a councillor for the Village of Carbon at the meeting held last Tuesday. S. J. Garrett was appointed mayor and H. Brown deputy mayor. S. F. Torrance is secretary and Dr. G. McFarlane medical health officer.

Regular meetings of the council are to be held the first Monday of each month at 8 p.m.

Russel Fraser has been appointed pound keeper for dogs and citizens are warned to purchase their dog licenses at once. Fees are males, \$1.00; females, \$2.00. Pound fees are 50c a day.

Do you know that --

If you save one dollar a week you will have a million dollars in 20,000 years.

It requires almost twice as much wind to play a cornet than it does to play a violin.

No need for anyone around CARBON to beef about the high cost of living, and that's for sure. LOOK THESE OVER!

## Man. Holstein Sets Record For Dominion

**Cow Owned By Rockwood Holsteins Of St. Norbert Establishes New High For Butterfat Production**

Amulree Baroness Pietje, a pure-bred Holstein cow owned by Rockwood Holsteins, St. Norbert, Man., has just established a Canadian record for butterfat production for two consecutive yearly tests on three times-a-day milking. Starting on test as an eight year old she produced in 365 days 1,098 pounds fat from 26,070 pounds milk, average test 4.21 per cent. butterfat and now has just finished her next yearly test with 1,259 pounds fat from 32,080 pounds milk (3.92 per cent. butterfat) for a two lactation total of 2,357 pounds fat from 58,150 pounds milk. Not only is this the largest two lactation butterfat record ever made by a Canadian Holstein on three times-a-day milking but it stands second regardless of times milked daily having been beaten only by the total of 2,357 pounds fat from 58,150 pounds milk made on four times-a-day milking in 1922 and 1923 by DeKol Plus Segis Dixie, owned by Hon. D. Raymond, Vaudreuil, Que.

The only Holstein in the world ever to surpass on three times-a-day milking the latest yearly record of 1,259 pounds fat made by Baroness, was Montvic Rag Apple Colantha Abbecker who in 1941 established her world championship record of 1,263 pounds fat from 29,208 pounds of milk at Mount Victoria Farms, Hudson Heights, Que. Canada thus has the honor of having the two top Holstein cows of the world on three times-a-day milking. It will be noted that the butterfat record of Baroness is just five pounds below that of the champion. Her milk record stands fourth in Canada.

## FUNNY And OTHERWISE

On Willie's return from his first dancing class, his mother asked "Well, Willie, how do you like your dancing lesson?" "Oh," he replied, "It's easy. All you have to do is turn round and keep wiping your feet!"

Tattered Tim: "I've been trampin' four years, ma'am, and it's all 'cause I heard that the doctors recommended walkin' as the best exercise."

Mrs. Prim: "Well, the doctors are right. Walk along."

"Should I marry a girl who can take a joke?" "That's the only kind you'll get."

"I see you have a sign in your shop, 'We aim to please,'" remarked the customer.

"Certainly," replied the shopkeeper, "that's our motto."

"Well," said the customer, "you ought to take a little time off for target practice!"

A little girl was told by her teacher to write a composition on "Ants". She began, "Ants are of two kinds — insects and lady uncles."

"Is that a dray horse you have there?"

"No, it's a brown horse, and stop your baby talk!"

## Dopey? Half Sick? Constipation may be the offender Million's find relief this way

Soothes, comforts and quickly calms intense itching. Don't suffer. Ask your druggist today for **D. D. D. PRESCRIPTION**.

**RUNS AS COUNTY SHERIFF**—Promising to clean up gambling, Mrs. Frances H. Wire of Willoughby, O., has announced her candidacy for office of Lake County sheriff. The gray-haired grandmother has had 25 years of police experience.

## Ontario Wants Alberta Gas

WINDSOR, Ont.—Ald. W. G. Riggs of Windsor said a \$65,000,000 pipeline to carry natural gas from Alberta to northwestern Ontario is being considered by a Canadian company. He did not name the company. "Alberta has enough gas to supply all Canada for 200 years," said Ald. Riggs. He said he will introduce a motion before council aimed at curbing the recurring gas shortages in Windsor and intimating Ontario operation of a pipeline to Alberta would be part of it.

In 1935 a Russian glider pilot made 300 loops, said to be a world record.

## Many Joining Canadian Navy

OTTAWA.—Recruiting for the Royal Canadian navy (Reserve), looked bright as 1948 got under way, for already two of the 20 naval divisions reaching from coast to coast had exceeded their quotas as the year opened, Hon. Brooke Claxton, minister of National Defence, said.

Both, however, are still recruiting. Six others, including the two with the largest interim complements, were past the 75 per cent. mark, and all but three of the 20 had advanced at least half way to their targets. A total of 3,106 reservists were under training as of January 1.

During 1947 the R.C.N. (R) had 1,600 officers and men afloat for varying periods.

## AUTOMOBILE ASSOCIATION SAYS LONGER HEMLINES DANGEROUS TO WOMEN

PHILADELPHIA.—The American Automobile Association is the latest group to oppose the longer hemlines for women.

Lower your hemline, cautions Burton W. Marsh, safety director for the auto club, and you lower your chances of survival as a pedestrian.

The reason: "Feminine legs, clad in light-colored stockings, catch the car driver's eye, particularly at night."

Girls in the new long skirts made of dark material haven't the same chance of being noticed in time.

Cinnamon was frequently used by the early Greeks as a votive offering to the gods. Egyptians imported cinnamon as early as 1600 B.C.

## LARGEST FISH HAUL

FLIN FLON, Man.—A Saskatchewan government freight haul arrived at this centre recently with the largest fish catch of the season, about 100,000 pounds packed aboard nine sleighs headed up by three tractors.

## TEACHERS NEEDED

KITCHENER, Ont.—Canada needs 7,276 teachers to reopen closed classrooms, Dr. W. P. Percival, director of Protestant education in Quebec and national president of Home and School associations, said recently.

What's come over me - these days?

Often a woman becomes panicky and gives way to fears and nerves — when perfectly natural changes are taking place in her system. And the unfortunate part is that these dark moods and fears may cause a nervous breakdown... needlessly!

Plenty of sleep, fresh air, wholesome food and Dr. Chase's Nerve Food will help to build up your vitality and tone up the whole system—so that nerves and hysteria are forgotten. Yes, when you're in good shape

physically and mentally—with no condition of "nerves" to magnify the slightest change—you can keep serene and happy right through the most trying times.

So remember, at the first sign of the fidgets, hysteria or nervous doubts—start building yourself up with Dr. Chase's Nerve Food. You'll rest better, look better, feel better. Keep yourself in good condition with this time-proven remedy which has helped thousands of Canadian women. The name "Dr. Chase"

## CARBON NEWS

A plane from Three Hills visited Carbon this week to pick up the furnace repair men who were working in town. The pilot had some difficulty finding a place to land but finally made a successful landing on Bert Charlebois' summerfallow.

★  
Born - to Mr. and Mrs. Bob Shaw, a daughter, February 29.

★  
There has only been mail in Carbon twice in the past ten days. Too much snow.

## Queen Rides Stoneboat

Beiseker's carnival queen, Miss Phyllis Huether, had to be taken home on a stone boat the day after she was crowned when roads became badly drifted during a blizzard.

Skating and drill displays featured the Lions Club carnival which was directed by Mrs. Carl Schmaltz assisted by Mrs. K. Wright.

Mayor Frank Lount was chair-

man. The program included selections by the local band and the crowning ceremony for the queen, who was crowned by Miss Elaine Meidinger, 1947 queen. Presentations were made to all participants in the ceremony including Florence Hagel, Marie Schwartzberger and Jennifer Bader.

The program consisted of an Easter bunny parade; solos, junior girls fancy skating, senior drill, fancy skating by boys and girls, senior girls drill, grand march. Outstanding skating displays were given by Miss Agnes Boyd.

Clown acts were given by Lawrence Schmaltz and Leonard Lavoie.

Others taking part in the carnival were Lawrence German, Jean Reifsynder, Marie, Betty, Bernice, Clair, Louis, Catherine, Peter, Donald and Mattie Schmaltz, Joey and Margaret Wright, Francis Lavoie, Bernadette and Lawrence Velker, Bea Brosteau, Rose Meidinger, Donald Uffelmann, Jerry and Marilyn Silbernagel, Carol and Mervin Goodman, Frances and Jackie Bettin, Emily Borgardt, Bernice and Marjorie Selzler, Donna and Allan Velker, James and Jackie Selzler, Harvey Olsen, Leonard, Albert, Marie, Donnie, Martin and Donald Hagel.

A radio was won by Bill Mulvey and a razor by Harry Simmonds.

Dad: "Golly, I plumb forgot! I'll do that right away."

*If your subscription is unpaid your Carbon Chronicle is liable to be discontinued immediately.*

Mail your cheque for \$2.00 now!

## Are You Free to Choose When, Where, and to Whom You Shall Sell Your Wheat AND AT WHAT PRICE?

The Answer is—NO!

If you are satisfied to sell it to the Wheat Board at a controlled price, about one-half of what you would now get for it on a free and open market, well and good.

But if you want to sell your wheat on a free and open market and get a much higher price than the Wheat Board pays, why should the Government stop you?

Freedom of choice should be yours as to when, where, to whom and at what price you shall sell. Do you have it now?

Why should prairie wheat growers be compelled to pay the whole cost of subsidizing cheap wheat for Britain as well as cheap wheat for home consumption? These subsidies should be paid by the Government, that is by all the people and not loaded on to wheat growers alone.

You are compelled to pay top prices for everything you buy. Why not then demand top prices for your wheat?

We repeat—if some farmers are satisfied with a low price for their wheat, why should they and their leaders stop you from getting high prices for yours?

Do you realize how you are now controlled and regulated by the Canadian Wheat Board Act and its Amendments? If you don't, send at once for the pamphlet which gives you the facts.

Mail the coupon below and DO IT NOW.

To The Winnipeg Grain Exchange,  
Winnipeg, Manitoba.

Please send me the pamphlet explaining how I am regulated and controlled by the Canadian Wheat Board Act and its Amendments.

## Easy Way To Redeem War Saving Certificates

B of M Service Helps You  
Avoid Bother, Save Money

Many Canadians have found a simple way to cash their War Savings Certificates, they just deposit them with the Bank of Montreal. As each Certificate

falls due, the B of M has it cashed and credited to their account, automatically. The service costs very little.

This method saves folks the chore of sorting Certificates every month, endorsing and mailing each one to Ottawa when it falls due, and then cashing or depositing the cheque for it.

Many people find this new B of M service a real help in saving for something worth while, points out Dan Rusler, local manager. Since the proceeds of their Certificates go straight into their savings accounts, they're less inclined to spend the money than if it passed through their hands first.

Make a point of putting your Certificates into B of M safe-keeping tomorrow. It's a safeguard for your plans for the future, and a step you won't regret

### The Case for Seed Treatment

The kind of crop Western Canada is going to harvest in 1948 depends in no small measure on what kind of seed farmers plant this Spring. Farmers should not only be interested in the quality and purity of the seed they sow in 1948 but also in the freedom from disease.

**Seed Treatment Needed.** During the last few years Line Elevators Farm Service has examined thousands of farmers' seed samples of wheat, oats, barley and flax. These extensive seed tests have clearly indicated that a very large proportion of the seed-grain that is sown each year in Western Canada carries disease-producing organisms, or is damaged by weathering or threshing, in sufficient amount to make seed treatment positively necessary. Therefore, the best advice we can give to a farmer is this: Take no chances! Unless you know your seed is undamaged and free of smut and other diseases, treat it.

**Seed-Treating Methods.** The seed disinfectants (fungicides) recommended for the control of surface-borne smut and other seed-borne diseases of wheat, oats and barley, and for the treatment of flax, are the organic mercury dusts (Ceresan, Leytosan, etc.). For small grain crops the rate of application is 1/2 ounce per bushel of seed; for flax, the rate is 1 1/2 ounces per bushel. Seed of these crops can be safely treated months before it is needed for sowing. It is important, however, to store such treated seed in a cool, dry, well-ventilated place. For best results, wheat seed should be treated at least 24 hours before planting. On the other hand, the seed of oats, barley and flax should be treated at least 7 days before it is sown.

Remember that the organic mercury dusts are poisonous. The precautions given by the manufacturer should be strictly observed. Seed treated with an organic mercury dust should not be used for food purposes, or fed to livestock.

For further information on seed treatment consult your local Agricultural Representative, or write to Line Elevators Farm Service, Winnipeg.

## The case of the 7 strangers

by Claire Wallace

There is a man in Canada who has the blood of seven total strangers in his veins. Maybe you wince at that idea. He doesn't. Without it, he would be dead.

Two years ago he was seriously injured in a crash. He received desperate head injuries, and a delicate operation was imperative. But shock and loss of blood had so weakened him that he couldn't have survived one. If... seven strangers had not stepped in.

They were Canadian men and women who had each given a blood donation to the Canadian Red Cross Blood Transfusion Service. When the doctors called for blood to save the life of the accident victim, it was the blood of those seven which pulled him through.

"Were you one of them?"

Today, he is a healthy, happy, useful citizen of Victoria, British Columbia. The only thing that marks him as different from the average man is a rather searching look that sometimes comes into his eyes as he walks along the street. For he often thinks of the seven who saved his life and wonders

who they are. As he looks into a stranger's face, he silently asks: "Were you one of them? If so, I thank you from my heart."

Similarly, the mother who gave birth to twins and would have died except for blood transfusions... the baby so anaemic at birth he could be kept alive only by donated blood... the maimed... the sick... the old—all those who owe their lives to blood transfusions say: "Thanks, unknown friend."

### Free blood for Canadian hospitals

The Red Cross Blood Transfusion Service plans, as soon as possible, to extend whole blood and plasma (free to all patients needing it, in hospitals across Canada. Already, two provinces—British Columbia and Alberta—provide this life-saving service. Last year, Alberta and British Columbia distributed 21,044 bottles of whole blood and 2,364 bottles of plasma, resulting in the saving of many lives.

But it takes money as well as blood to save these lives. Remember this, as the Canadian Red Cross appeals to you now for funds. Give generously. A life may depend upon your donation.

Red Cross Services include: Blood Transfusion, Outpost Hospitals, Aid to Sick and Disabled Veterans, Treatment for Crippled Children, Disaster Relief, Nutrition Services, Home Nursing Courses, Swimming and Water Safety, etc.

The work of mercy never  
ends... Give generously to  
the CANADIAN RED CROSS

## WORLD HAPPENINGS

### BRIEFLY TOLD

About 450 dogs exported to Canada and the United States last year earned Britain nearly \$1,000,000.

Burma will have about 1,600,000 tons of rice available for export this year, it was officially announced.

Work has begun at Belfast on building one of the largest aeronautical research centres in the world.

Geneva was unanimously chosen as the meeting place for the first assembly of the United Nations world health organization in June.

The French foreign ministry has announced the appointment of former vice-premier Francisque Gay, 62, as French ambassador to Canada.

An estimated 500 homes will be erected in Edmonton by city contractors under the federal government's integrated housing plan.

When a Melbourne artist announced recently that he wanted a crew of 20 to accompany him on a world cruise in an 80-foot ketch, he received 520 applicants, 30 of whom were women. No women were taken.

A committee at Shawbury, Shropshire, England, is studying the possibility of using trained falcons to clear airports of birds which last year caused £20,000 (\$80,000) damage to aircraft with which they collided.

### Reindeer Run Rings Around Snowmobile

THE PAS, Man.—A motorized toboggan is no match for the speed of a caribou as Game Guardian Edward Johanson found out.

Johanson said he had been tobogganing from Cross Lake to Wabowden when his machine, traveling well above 30 miles an hour, overtook an ambling herd of caribou on a small lake.

The caribou observed the low-slung vehicle with interest and playfully galloped ahead for a time. But then, said Johanson, they apparently tired of the "slow speed" and began running in circles around the traveling machine.

### JAP BIRTHS INCREASE

TOKYO.—Japan's birth rate is increasing and her death rate declining, the welfare ministry has announced. This resulted in a population gain of 1,050,000 last year, Japan's population is estimated at 80,000,000.

During a person's waking hours, the eyes are in a continuous state of activity. 2764

**VICKS VA-TRO-NOL**

## Gives Warning Of Grasshopper Plague For 1948

REGINA. — Warning that grasshoppers, the bane of western farmers during the mid-thirties, would be more numerous and widespread in Saskatchewan in 1948 than in any year since 1940, was issued by Agriculture Minister I. C. Nollet.

Referring to the 1948 grasshopper forecast prepared by the Dominion entomological laboratory, Saskatoon, he urged municipalities to order bait and other supplies immediately in preparation for an all-out control campaign.

"Bait spreaders should be put in working condition now," Mr. Nollet said. "A good poisoning campaign can prevent spring damage to crops and poisoning in the spring can also reduce the extent of crop damage by winged grasshoppers in the fall."

The Dominion entomological laboratory forecast showed grasshopper eggs present in sufficient numbers in 170 municipalities to threaten crops this spring, with the infested area extending southward from North Battleford to the U.S. border and from Alberta eastward to Wynyard, Regina and Estevan.

Intensity varies from very light and patchy to continuous and severe. Infestation is largely of the roadside and field margin type, although light to moderate stubble infestation was found in all the severe and moderate areas south and east of the South Saskatchewan river. Over the rest of the area field infestations were very minor except in a few areas of light soil.

Contributing largely to the severity of the expected outbreak are heavy concentrations of eggs of the two-striped grasshopper, Packard's grasshopper and the roadside grass-

hopper along field margins and on roadsides, with more moderate infestations of the lesser-migratory or stubble grasshopper found in the forecast areas south of No. 1 highway and in the Davidson-Craik district.

### CHINA'S GREAT WALL

China's Great Wall was begun by Chin Shih about 200 B.C., and is constructed of brick and stone. Ten years were required to construct it.

Mary Queen of Scots became Queen of Scotland when only a week old.

### PUTS \$5,000,000 VALUE ON TWO-DAY RAINSTORM

LOS ANGELES.—Agricultural officials put a \$5,000,000 value on a two-day rainstorm which broke the southern California's worst drought in 78 years recently.

Rain totals topped two inches in some sectors, with mountain snow piling up to a depth above three feet at high levels.

The gusty storm brought hail and even snow to some valley points.

The forested area of Canada covers about 1,220,400 square miles.

**EMPEROR ATTENDS JAP DIET OPENING**—Emperor Hirohito sits above the crowd as he attends the opening session of the Japanese diet. This is the first really democratic parliament in the history of Japan. In foreground, below the emperor, speaker of the house Hosue K. Matsuoka is reading an address.

**CATS! MILLIONS OF THEM**—No effort will be required to supply Europe's need for cats to kill off the thousands of rats which are destroying grain and other food. According to Humane Society experts, any large city could supply the 50,000 alley cats that Europe needs. And like this ferocious-looking mouser, they would be ideal for the job.

**JEWS SEARCH ARABS, ARABS SEARCH JEWS**—Although they work side-by-side in the Jerusalem, Palestine, postoffice, Arab and Jewish workers view one another with suspicion. In the above picture a Jew is shown searching an Arab for weapons, while an Arab frisks the pockets of a Jew. A British policeman looks on. At right, a barbed wire entanglement protects one side of the building. According to news dispatches, large concentrations of Arabs were reported northeast of the city, and a new Arab large-scale offensive was anticipated.

**WIFE OF CANADA'S AIR ACE SEEKS DIVORCE**—Diana Eve Whittall Beurling, wife of George "Buzz" Beurling, Canada's top-scoring fighter ace of World War II, has petitioned parliament for a divorce. Mrs. Beurling is a stenographer, now living in Westmount, Que., formerly a resident of Vancouver. With a score of 31 German and Italian aircraft destroyed, Beurling was the deadliest of Canadian fighter pilots and a master of deflection shooting. Mrs. Beurling's divorce petition, which must be approved by parliament because she is a resident of Quebec, was entered last June. Evidence will be heard by a Senate committee and the petition must then be passed by both Houses.

**SEEKS \$76,000,000 PIRATE HOARD**—With five maps and explanations that she is confident will lead her to the treasure, Mrs. Bula E. Croker, widow of New York's famed Tammany Boss Croker, is looking forward to recovering a cache of pirate gold, estimated at \$76,000,000. The gold, she says was buried in the years 1781 to 1783, 40 miles from Pensacola, Fla. She owns the land where the treasure is buried. She is negotiating with a firm of contractors to help her dig up the mazzama. The maps came into the family when Mrs. Croker's grandfather was a boy. They were originally in the possession of a Spanish sea captain.

**CO-INVENTOR OF AIRPLANE DIES**—Orville Wright, 76-year-old co-inventor of the airplane, shown here with old and new plane models, died in his sleep under an oxygen tent at Miami Valley hospital, Dayton, O. World pioneer aviator, who admitted he never had envisioned his airplane as the world's big military weapon, Wright succumbed to a lung congestion and heart disease.

**ICE JAM IMPERILS CHICAGO WATER SUPPLY**—A tug noses in close to the intake pipes of a water supply "crib" in Lake Michigan in an effort to break an ice jam. Following sub-zero temperatures the floes choked the pipe openings and cut off all water from nearly 2,000,000 Chicago residents. Workmen dynamited the ice to start water flowing again.

**GOOD USE FOR BARRAGE BALLOONS**—A group of Japanese boys and girls stand beside a half-inflated barrage balloon in Tokyo wearing raincoats made from the waterproof materials of the balloons. These balloons, which were formerly used by the Japanese navy to prevent low flying planes from approaching the Yokosuka naval base, were turned over to the Japanese Red Cross to help alleviate the shortage of wet weather materials in the country.

**SIR ALEXANDER OBJECTS**—Screen Actress Loretta Young, (left), is engaged in an international disagreement with British tourist board executive Sir Alexander Maxwell. The Hollywood star, recently returned from England, refuses to retract her statement that Britain is near starvation. Sir Alexander implied Miss Young is talking through her bonnet and demanded a retraction as her words hurt his tourist trade.

**FLYING FISHERMEN MAROONED ON LAKE SIMCOE AT 26 BELOW**—Missing after Lake Simcoe fishing flight, Harry Kift, 23, (left), was found. Pilot and owner of this plane, missing in 26 below weather, was Merlin R. Mackie of Oshawa, who stands beside it with his son. Ross Mackie and Kift planned to fish. Found with his companion on frozen Lake Sim-

coe was Merlin Mackie, pilot, (centre). Warm and safe inside a fishing hut like this one, (right), being taken out on the ice, the two men spent the 30-below zero night when they found the plane wouldn't start.

## OUR COMPLETE SHORT STORY—

## :: CAR THIRTEEN ::

By E. JERVIS BLOOMFIELD

BENTON wiped his glove over the inside of the windshield. Ice crystals showed in the pish against the two arcs of the swipes.

"A couple degrees drop and it'll be snow, sergeant."

I roused myself. "Yeah. Makes dirty driving. But we only got a quarter hour till four."

"Right."

"We haven't been shooting the breeze much. Don't you and Williams talk?"

"Not much. I'm no hand at gossip."

"Married?"

"Yeh."

"How long?"

"A bit over a year."

"Tough having to work nights."

Harry Benton was a new man.

When his partner was taken sick, I'd had to pinch hit.

Car Thirteen eased onto Fifth Street, and the clock showed ten to four. The slush was getting thicker and the trolley tracks didn't show any longer.

The radio crackled and I saw Harry stiffen.

"Car Thirteen. Calling Car Thirteen. Code sixty-seven. Code six seven. That is all."

That woke me up plenty.

Harry turned carefully and stepped on the gas. The wheels spun. I was getting mad.

"A hospital call, with ten minutes to go! I tell ya, Benton, there is no justice!"

He nodded, "Maybe not ... and again, maybe..."

We hadn't gone two or three blocks when the radio beeped again. Harry eased on the gas.

"Calling all cars. Calling all cars. Code twenty-three. Code two three. All cars..."

We crawled a little as he touched the brakes. I was too sore to speak.

"Well...?" he asked tentatively.

"That's inner blockade—that's dynamite," I said. "What would you do if you were sergeant?"

Reluctantly he started the U-turn. "Head for West Waterway—that's our station. But they ought to cancel."

Then the radio came in with details: "Stick-up at Maynard's. Get away car is tan sedan. Car Thirteen cancel six seven..."

"There it is!" I swore. "There is no justice. It's not as though they ever show up—just keep you waiting all night."

"Yeh!"

Harry looked grim as he pushed the walling car into the whitening night. It didn't take two minutes to reach the bridge. He came to a stop in the middle of the viaduct, switched on the roof spot, unloosed his holster.

I reached for the riot gun, opened the door.

"Never do show up. Just keep you waiting until you're froze."

Then two headlights showed from the city side, grew bright and wider apart. They were belting right along.

Harry twisted the spot as I circled. The light caught the other driver. He locked his wheels, swung sideways.

I heard Harry yell, "Get clear, sergeant!"

He backed his spinning wheels over the footwalk. I slid for points north. The tan sedan spun between us like it was acting for the movies. It finished one circle, kept going.

The tail-lights faded, and I heard Harry howl, "It's them! Jump in!"

The outfit was well in the clear before we set sail again. I called HQ on the two-way and gave them the dope. Then we started to edge up on them. The way we travelled over that slick made me nervous.

"Keep this up, and we'll finish in the morgue."

"Yeh? Better limber your gun and start on their tires."

Little stabs of red flame came from the car ahead. Our windshield cobwebbed as the slugs hit.

I pushed open the gun port, went to work—and I wasn't aiming at rubber.

The driver gave a little jerk and the sedan started to weave. The man on the right leaned over, tried to manhandle the wheel. They hit the curb, slid on one side until a building stopped them. It took us another hundred yards to get ourselves under control.

Back at the wreck you could hear the wail of other sirens, like a pack of hungry wolves. It wasn't until the ambulance and dead-wagon had come and gone that the lieutenant gave us the good word.

"Back to the station and make your report. Then you can check out."

I stamped the snow from my boots. "About time. But I'm glad we were there. They sure came helling across that bridge."

**CANADIAN SAVED AS TANKER SINKS**—The Canadian oil tanker Pancho, of Panamanian registry, is reported sunk off the coast of France. Survivors reaching Lorient, France, said 18 died in the battle against heavy seas. One Canadian, believed to be Wilfred Bulger of Eganville, Ont., was among the 12 rescued.

## Western Briefs

**ARCOLA, Sask.**—This southeastern Saskatchewan town's first woman settler, Mrs. Lovinia Beggs who settled here in 1882, celebrated her 100th birthday recently. Born in Prescott county in Ontario, Mrs. Beggs received congratulatory telegrams from the King and Queen and Prime Minister Mackenzie King.

**RED DEER, Alta.**—Plans for another Alberta pulp mill are being contemplated by an anonymous client of a Seattle engineer. The mill is to be located in the Red Deer area. Application for a timber berth has been made to the provincial government.

**KELOWNA, B.C.**—Hunters coming to British Columbia increased nearly 500 per cent.—from 4,000 in 1943 to 19,000 last year, Game Commissioner James Cunningham told Kelowna Rod and Gun club. "That's a little bit more than B.C. can stand," he said. "Tourist associations may be proud of these figures, but they give the game commission cause for alarm."

**WINNIPEG.**—Grocery and department stores here have launched a campaign to wipe out shoplifting, with 16 convictions on such charges recorded since beginning of the year, city court officials said.

**GWYNNE, Alta.**—A new central school of 5 rooms is being planned for Gwynne, Alberta, in the Wetaskiwin district.

Harry wheeled us right smart to town. But he missed the turn off Fifth to headquarters.

"Hey! Where ya going?"

He grinned. "I haven't forgotten that code six seven."

"Hospital call! That's forgotten. What do you want to follow that up for?"

"The wife's there. I asked them to tip me off—I'd like to know if it's a boy or a girl."

## Horse Population Declining Rapidly

**TORONTO.**—The horse population in Canada continues its rapid decline, due to old age and the processing of horses for human consumption, T. P. Devlin, of Winnipeg, Man., secretary-treasurer of the Clydesdale Horse Association of Canada, told the annual meeting.

Mr. Devlin said the two processing plants at Swift Current, Sask., and Edmonton, are working at capacity. Since these plants started operations two years ago, \$7,000,000 in products have been sold from the processing of 100,000 horses, he added.

## LEDUC OIL FIELD MAY LAST 25 YEARS

**CALGARY.**—The Leduc oil field may last 20 to 25 years if produced at an economical rate, J. D. Gustafson of Calgary, representing the Imperial Oil company, said at a public hearing before the Alberta Petroleum and Natural Gas Conservation board.

The hearing is being held to hear submissions from oil companies interested in the field on production rates to be imposed on oil wells in the field to allow for economical production.

*Hello Folks!*

"An important part of my diet ever since my first bottle has been Crown Brand Corn Syrup. Now, that may be all right for a little character like myself, but let me tell you, these grown-ups sure are lucky what with Mom serving them Crown Brand Corn Syrup with so many of their dishes. And she uses it in her baking, too, as a sweetener. I can hardly wait until I'm old enough to have some hot waffles or pancakes smothered with delicious Crown Brand. If it's as good as it is in my cereal—mmmmmm!"

\*For years doctors have recommended the use of Crown Brand Corn Syrup as a satisfactory carbohydrate acting as a milk modifier for bottle-fed infants.

### FARMER'S COLUMN

By R. J. Milligan

The cultivation in July, preferably done with a cultivator or blade weeder, will kill the cereal grains; this adds to the stubble or trash already accumulated. I believe all clear-thinking farmers appreciate the fact that many fields of fallow get weedy during harvest. When this occurs, much of the previous work done to control the weeds, conserve moisture and accumulate plant food, has been lost.

We now know that various 24D products can be used to kill different weeds at different stages of growth. For example Canada Thistle and Perennial Sow Thistle are best treated when in the bud stage of growth with a stronger concentration of 24D product. We have also learned that the 24D with the salt base is readily washed off with rain, whereas the other bases of 24D affect plant growth shortly after being applied and their killing properties are not reduced to the same extent by rainfall.

Therefore in view of the above I am suggesting that if rain delays your harvest why not spray the field of summer fallow to destroy the weeds and avoid cultivation? A point to consider is that after heavy fall rains many of our fields are too wet to allow plowing of thistle patches but with a 24D product of an amine or ester base these thistle patches can be sprayed and destroyed.

The argument for soil conservation can be carried even further by suggesting that you do no summerfallowing at all. It is a broad statement but based on results obtained by the Lethbridge Dominion Experimental Station which, after 11 years of work, found that summerfallow gave a cash value of only three cents per acre over constant cropping. Such a fact makes me wonder why such large expenditures are put into farm machinery to prepare summerfallow and break up our soil, if we can expect a cash value or return of only three cents per acre.

Keeping this in mind how can we plan our cropping practices to eliminate summerfallowing? As I see it, we must use D42 sprays to prevent weed growth, plant less seed per acre and fertilize that which is sown. We also must plant grains that mature early so as to kill wild oats. At the outset we must expect less yields per acre, but remember that you have had less cash outlay and no summerfallowing and at the same time you are not having your land blown or broken up. If we can expect weed control with proper application of 24D and science shows we can, then less fallow is needed for weed control. What then is to be done?

Let us start with a field that has been fallowed and grown a crop of wheat. Our next crop could be either oats or barley. I would prefer an early maturing oat. These should be planted as early as the season will permit being sure that they will germinate rapidly. The oats should be seeded about one-quarter bushel to the acre less than normal seeding. Seed with a tiller so that any weeds that do occur will be killed. Fertilize

at the same time with, say 45 to 50 pounds per acre of 11-48. A packer should be pulled behind the tiller to firm the seed bed and hasten germination.

### Price of Gas

So the oil companies want to raise the price of natural gas, and their main reason is that "the cost of everything else has gone up."

That is just about the best reason why the cost of gas should not rise.

Somewhere, somehow, this increasing spiral of prices must stop.

The oil companies are making plenty of money. The producing companies, in particular, are doing very well, with oil at better than \$3.00 a barrel.

Still they are greedy for more money. Will they never be satisfied?

Business interests are worried about the possibility of a CCF government being elected in this province when polling time comes around again.

The greed of oil companies, oil promoters and stock sellers may quite easily bring that about. The next election might be fought on an "oil issue."

If the oil companies are wise they will drop their application for more money for the gas they supply. That gas properly belongs to the people of Alberta, and not to them.

If the Alberta government is wise it will not permit an increase in natural gas rates.

### The World of Wheat

The directors of the Canadian Seed Growers' Association and

the Dominion Plant Breeders Committees have just met in Winnipeg.

Among the matters discussed was the damage that might be done by 24D to grain crops, quite apart from the killing of weeds. Plant breeders and others are quite concerned about this for it has already been found that under certain conditions some damage does occur, and that one peculiar feature of the use of 24D is that it causes abnormal types of heads to appear in a crop. Whether these abnormal heads will have an adverse effect on the milling and baking value of the grain is not known but experiments to find out are under way. It is difficult for an inspector of registered crops to determine whether the abnormal heads are caused by 24D or whether some of them are natural off-types. If off-type appear in a crop then the field would have to be refused registration. The Canadian Seed Association therefore, strongly urges those who are producing Elite and First Generation Registered stocks not to use 24D on such fields until more evidence is available. No recommendation was made about 24D on registered crops other than Elite and First Generation. Personally I would not use 24D on any Registered crop until further scientific experiments have been made.

### What's the Good of UNEMPLOYMENT INSURANCE?

\$87,500,000 was paid from the Unemployment Insurance fund to unemployed Canadians from September 1, 1945, to October 31, 1947.

\$31,000,000 was contributed to this fund by the Government of Canada.

500,000 individual unemployed workers and their dependants benefited from these payments.

In many cases had payments not been available the unemployed would have suffered want!

What's the good of Unemployment Insurance?—Can there be any doubt!

Unemployment Insurance helps the employer by providing unemployed with purchasing power; and helps the worker by providing maintenance allowances during unemployment. Employer and Employee and the Government all have an interest—Unemployment Insurance is a large factor in a healthy National Economy.

Make full use of your local office of  
the National Employment Service.

### Department of Labour
